INTERNATIONAL WORKSHOP ON SUSTAINABLE WATER MANAGEMENT AND DEVELOPMENT OVER TRANSBOUNDARY SPACES

Welcome to the International Workshop on SUSTAINABLE WATER MANAGEMENT AND DEVELOPMENT OVER TRANSBOUNDARY SPACES organized by the European University Miguel de Cervantes (UEMC) of Valladolid (Spain) between 5 and 6 April 2016.

Our university try to respond to the exigencies of professional training for the sustainable development, despite times of hardship.

Facing the current challenges of society and primarily dedicated to the sustainable development, UEMC is oriented towards the integrated approach to the economic, social and environmental realities. True to its mission, our university aims to gather together researchers, students and professionals from environmental, management, economics, engineering and industry, in order to share the results of their scientific research, innovative ideas and practical experience related to sustainable development.

We hope that the international community of researchers concerned with water management under sustainability point of view will find our workshop the opportunity to identify solutions that can contribute to the sustainable development of our planet.

We invite you to celebrate together the joy of this event!

On behalf of the organizing committee,
Imelda Rodríguez Escanciano
Rector of UEMC Valladolid

INTERNATIONAL WORKSHOP ON SUSTAINABLE WATER MANAGEMENT AND DEVELOPMENT OVER TRANSBOUNDARY SPACES

Section 1 - Water management

- Legal framework, national agreements and EU water directive framework
- Water management policies and water cost
- Sustainable Water Resources Management
- Transboundary watersheds

Section 2 - Water quality

- Quality indicators monitoring for water, surface and underground water pollution
- Water supply; water treatment
- Wastewater management and treatment

Section 3 - Freshwater ecosystems

- Aquatic biodiversity: risks for conservation
- Importance of freshwaters ecosystems
- Climate change and distribution of aquatic species

Section 4 - Environmental Surveying and Engineering of Water masses

- Watershed Earth Observation
- Mathematical modelling in water resources management
- Disaster management, risks analysis and prevention measures, flood mitigation, vulnerability analysis, ecological reconstruction and resilience
- Land Reclamation

SCIENTIFIC BOARD

- Dr Roberto Martínez-Alegría. European University Miguel de Cervantes.
- Dr Isabel Montequi. European University Miguel de Cervantes.
- Dr Patricia Casanueva. European University Miguel de Cervantes.
- Dr María Angeles Rojo. European University Miguel de Cervantes.
- Dr José Francisco Sanz. European University Miguel de Cervantes.
- Dr Francisco Campos. European University Miguel de Cervantes.
- Dr Teresa Albuquerque. Polytechnic Institute of Castelo Branco.
- Dr Margarida Antunes. Polytechnic Institute of Castelo Branco.
- Dr María Jesús Sánchez. IRNASA-CSIC.
- Dr Antonio García. IRNASA-CSIC.
- Dr Ignacio Santa-Regina. IRNASA-CSIC.
- Dr Sonia Rodríguez. IRNASA-CSIC.
- Dr Javier Taboada. University of Vigo.
- Dr Fernando Manero. University of Valladolid.
- Dr Montserrat Ferrer. University of León.
- Dr Andrés Díez. Instituto Geológico y Minero de España.
- Dr Germán Sanz. University of Goias (Brasil).
